

GREEN SELECT

AVR SELECTED & REVISED SECOND-HAND MACHINERY

Quality retains its value, even as a second-hand machine. That's the goal of AVR Green Select: offering quality at an attractive price.

To guarantee this quality, an AVR Green Select machine is inspected by our own specialised technicians when it is purchased, and then restored by them to top working condition. Moreover, you enjoy an AVR warranty on your second-hand machine, and you can count on our support for the first start-up in the field or when you need advice about spare parts.

In brief, thanks to AVR Green Select, you can rely on the same AVR services and quality that you receive when buying a new machine.

Looking for a reliable second-hand machine? Then be sure to contact our regional manager in your area, who will be delighted to help you find the right machine for your business.

HOW IT'S DONE

FIRST CONTACT WITH AVR

AVR receives a request for takeover. The regional AVR account manager goes on site for an exploratory interview, takes photos of the machine and checks the specifications.

FIRST TECHNICAL CHECK

The AVR sales team and the AVR Green Select team determine the value of the machine. The customer receives an offer. If necessary, a technician visits the machine to carry out a thorough inspection.

MACHINE ARRIVES AT AVR

The machine arrives - clean - at AVR. It is checked whether all parts are with the machine as agreed in the takeover contract.

MACHINE REVISION

The machine is dismantled to replace defective and worn parts. Additional checks are carried out during dismantling for non-visible parts.

FINAL TECHNICAL CHECK

To finish off, a thorough check of the complete machine is done. All functions are tested for proper functioning.

READY TO GO IN THE FIELD

After the machine is sold, any additionally requested options are added and the machine is delivered to the customer.

★★★ **THREE STARS**

TECHNICAL MAINTENANCE

Complete overhaul of the machine

- Mechanical
- Electrical
- Hydraulic

Replacement defective parts

- Replace damaged plating
- Aesthetic touch-ups

Maintenance on machine

- Oil changes on gearboxes
- Maintenance on gearboxes
